## **American Heart Association CPR Cheat Sheet**

In 2010, the American Heart Association (AHA) released their 2010 Guidelines Highlights, which outlines the key changes regarding CPR procedures. The most prominent change was the rearranging of the order from A-B-C to C-A-B in the CPR sequence, emphasizing the chest compressions. The AHA's research concluded that the old approach creates an unnecessary delay in chest compressions.

## **The Revised American Heart Association CPR Guidelines**

The new guidelines do not have any major changes, but here are some of the basics: No more than 120 compressions per minute with a minimum of 100. Chest compressions for adults should be no more than 2.4 inches and at least 2 inches. 911 Operators should be trained to help bystanders check for breathing & recognize cardiac arrest.
