Chapter 11 Endocrine System

This gland is regarded as the master gland as it controls the functions of all the other glands (such as the adrenal, thyroid glands) in the endocrine system. The pituitary gland stimulates the adrenal gland to secrete cortisol, a steroid hormone controls a range of activities from controlling the body's metabolism to stimulating blood pressure.

Endocrine System Review Flashcards | Quizlet

The endocrine gland is the major player in this system. The primary function of these ductless glands is to secrete their hormones directly into the surrounding fluid. The interstitial fluid and the blood vessels then transport the hormones throughout the body. The endocrine system includes the pituitary, thyroid, parathyroid, adrenal, and ...

17.1 An Overview of the Endocrine System - Anatomy and ...

Dysregulation of hormones affects the musculoskeletal system in various ways. Growth Hormone (GH) deficiency can lead to decreased muscle mass and strength, increased abdominal fat, and poor bone quality and density, 1 as GH and IGF-1 directly stimulate osteoblasts and modulate osteoclast turnover. 6 There is an association between fibromyalgia and GH deficiency, attributed to alpha-delta ...

Endocrine abnormalities affecting the musculoskeletal system

The nervous system is a very complex organ system. In Peter D. Kramer's book Listening to Prozac, a pharmaceutical researcher is quoted as saying, "If the human brain were simple enough for us to understand, we would be too simple to understand it" (1994). That quote is from the early 1990s; in the two decades since, progress has continued at an amazing rate within the scientific ...

Ch. 12 Introduction - Anatomy and Physiology | OpenStax

Sarcoidosis is a disease involving abnormal collections of inflammatory cells that form lumps known as granulomata. The disease usually begins in the lungs, skin, or lymph nodes. Less commonly affected are the eyes, liver, heart, and brain. Any organ, however, can be affected. The signs and symptoms depend on the organ involved. Often, no, or only mild, symptoms are seen.
