Heat Absorption Gizmo : Lesson Info : ExploreLearning

Read Book Gizmo Answers On Heat Absorption

The Gizmo shows that when light strikes an object, some wavelengths of light are reflected while other wavelengths are absorbed. A red object will reflect wavelengths in the red part of the spectrum while absorbing green and blue light, which is why we see the object as red. A red object will not heat up in red light (because it is reflected) and will heat up more in blue or green light.
