I guess that you are looking for a continuous function $f: \mathbb{R} \rightarrow \mathbb{R}$ such that f is differentiable everywhere but f' is 'as discontinuous as possible'.. We have the following theorem in real analysis. Theorem 1 If $f: \mathbb{R} \rightarrow \mathbb{R}$ is differentiable everywhere, then the set of points in \mathbb{R} where f' is continuous is non-empty.

real analysis - Discontinuous derivative. - Mathematics ...

increases students' achievement and academic interest. In this article, we use meta-analysis to analyze studies that have tested the effects on students of SS compared with coeducational (CE) schooling. We meta-analyzed data from 184 studies, representing the testing of 1.6 million students in Grades K-12

Foundations of mathematics is the study of the philosophical and logical and/or algorithmic basis of mathematics, or, in a broader sense, the mathematical investigation of what underlies the

philosophical theories concerning the nature of mathematics. In this latter sense, the distinction between foundations of mathematics and philosophy of mathematics turns out to be quite vague.
