Botany, also called plant science(s), plant biology or phytology, is the science of plant life and a branch of biology. A botanist, plant scientist or phytologist is a scientist who specialises in this field. The term "botany" comes from the Ancient Greek word βοτάνη (botanē) meaning "pasture", "herbs" "grass", or "fodder"; βοτάνη is in turn derived from βόσκειν (boskein ...

Osmosis is the natural process involving the potential fluid flow from high salinity to low salinity across a membrane. Desalination technology has focused largely on reverse osmosis technology, in which the osmotic pressure across a membrane is overcome by applying pressure to a high salinity solution (i.e., seawater or brackish water).

Water has many important functions in our body. Water acts as a transport medium in blood and secretion e.g. in digestive juices, tears. Water is a good lubricant and acts to reduce friction when combined with particular proteins e.g. mucus to aid external movement. Many chemical reactions take place in an aqueous medium (Jones M.et al.2000)

Thank You Ma'am Analysis. In the American short story "Thank You, M'aam," Langston Hughes creates a powerful plot emphasizing themes of kindness and forgiveness. Setting the story in the 1950s of America where African Americans still faced prejudice and segregation in society, Hughes captures a snapshot of the life, experience, and culture back then.
