Explanation: Find the intersection for each pair of lines. Using the initial two equations, let's try substituting the second into the first by solving the second for y:  $y = -2x$   $\rightarrow x + 3(-2x) = 1$   $\rightarrow -5x = 1$   $\rightarrow x = -\frac{1}{5}$  Then plug that back into either of the first two equations to find the y-coordinate of the intersection.

The Big Bang theory is the prevailing cosmological model of the observable universe from the earliest known periods through its subsequent large-scale evolution. The model describes how the universe expanded from an initial state of high density and temperature, and offers a comprehensive explanation for a broad range of observed phenomena, including the abundance of light elements, the cosmic ...
